

3D MARKING FUNCTION

INTEGRATED VISION SYSTEM

OPTIONS

SIC MARKING, A GLOBAL SPECIALIST IN MARKING AND TRACEABILITY SOLUTIONS.

SIC Marking is an international group developing permanent marking solutions and vision systems for the traceability of industrial components. SIC Marking has developed a complete range of dot peen, scribing and laser marking machines.

With 30 years of experience, SIC Marking develops traceability applications for a wide range of materials such as steel, alloys, stainless steel, titanium, aluminum and plastics. Today we work with professionals in various industries such as: automotive, aerospace, metallurgy, mechanical engineering, plastics processing, railway, medical, construction, defense...

With an experienced, responsive and involved team, SIC Marking offers a complete range of standard products, and custom machines to meet all your needs.

The mark of quality

LASER TECHNOLOGY: FAST AND HIGH QUALITY MARKING ON ALL MATERIAL!

To meet the ISO quality requirements, traceability is essential. This is the reason why laser marking is used by manufacturers to automate marking operations and thus guarantee 100% control of their processes.

This laser marking technology consists of releasing radiation from a source. It is then amplified through an optical fiber and directed through a galvo head toward the part to be marked. The beam focused on the material by the lens creates a marking chemical reaction.

SIC Marking's fiber laser doped with Ytterbium is a latest generation technology. It is high performant, enduring, easy to implement and without maintenance cost. This technology is mainly used for direct marking on all types of materials, from plastic to metal parts, irrespective of their hardness or surface finish. The laser makes it possible to carry out quality marking in a reduced cycle time.

OUR INTEGRATED LASER SYSTEMS

Our integrated laser systems have been engineered for intensive use in any industrial working environment. They can be integrated into production lines or used as a stand-alone marking station. They are suited for both low and high rates of production, and can be fully customized with additional features and tools. Manufacturing dedicated tooling systems or adding extra axes (e.g. Z and rotary) can be made on request.

- + GREAT VALUE FOR MONEY**
 - SIC Marking fiber laser
 - Proven technology
 - Multi applications (metals, plastics...)

- + VERSATILITY**
 - Marking on all types of materials and difficult surface conditions
 - Surface or hollow marking
 - 1D or 2D codes (Data Matrix) marking
 - Images or vector logos marking
 - Decorative marking

- + ROBUSTNESS AND RELIABILITY**
 - Long-life components ($\geq 100\,000$ h)
 - Suitable for intensive use in industrial environments
 - Reduced maintenance
 - 2 years warranty

- + EASE OF USE AND INTEGRATION**
 - Small size
 - Built-in communication cards and memory
 - No PC required to operate on the line
 - Adjustable pulse duration per object (for HD configuration)

A RANGE OF MODULAR MARKING LASERS

• Available configurations:

Easy 20-30W

Excellent value for money
Marking on all types of materials
and difficult surface conditions

Easy 50W

Deep marking
Ultra fast marking

HD 20W

Multi material (ideal for aluminums
and plastics...)
Reduced cycle time

VERSATILITY

HIGH POWER

HIGH CONTRAST

• Mechanical features:

i104	
Marking window	☐ 60 mm ☐ 100 mm ☐ 170 mm ☐ 220 mm ☐ 300 mm* (*consult us)
Weight	5kg
Consumption	750W
Security	Class 4 Laser (EN60825-1 standard) to secure
Software	SIC Laser software
Pulse duration (for HD configuration)	from 2 ns to 200 ns

CUSTOM-MADE INTEGRATIONS

An engineering design office is available for the integration of your custom-built machines.

- + I104 laser with protective case for manual marking of metal sheets.**

- + Laser station equipped with a loading drawer and dedicated vision system.**

- + Protective sleeve for laser.**

THE FIBER UNIT

+ TECHNOLOGY & DESIGN

- Operating method: pulsed (variable frequency)
- Consumption: 750 W
- Wavelength: 1 064 nm
- Digital axis control (linear and rotary)
- Ultra Compact: 4U height (177mm)

+ RELIABILITY AND PERFORMANCE

- Long-life components ($\geq 100\,000$ h)
- Self diagnostic function
- Cooling: by air only
- Warranty: 2 years (5 years optional)

+ COMMUNICATION CARDS (optional)

+ OPERATING

- Laser driven by «SIC LASER» software
- USB interface, Windows environment
- User-friendly interface with icons navigation

• Programming mode:

- Creation of entities to be marked: characters, logos, 1D or 2D
- Font choice «True Type»
- Pen setups

• Production mode:
